Individual protection measures, such as personal protective equipment

General Protective and Hygiene Measures:

Keep the product away from food, beverages, and animal feed.
Wash hands before taking breaks and after completing work.
Avoid eye and skin contact.
Refrain from eating, drinking, or smoking while using the product.
Remove contaminated clothing and wash thoroughly before reusing.
Do not inhale vapors or mists.

Respiratory Protection:

If ventilation is inadequate, use an appropriate respiratory protective device. In poorly ventilated areas or when spraying, an air-fed mask is recommended. For shorter periods, a combination of a charcoal filter and a particulate filter (A2-P2, EN529) is advised.

Hand Protection:

Wear chemical-resistant gloves that comply with standard EN 374-1. Gloves must be impermeable and resistant to the product or substances being handled. Consider glove material based on penetration times, diffusion rates, and degradation.

Material for Gloves:

For handling at room temperature:

- Butyl rubber (IIR) with a thickness of ≥0.5mm and a breakthrough time of ≥480 minutes.
- Fluorinated rubber (FKM) with a thickness of ≥0.4mm and a breakthrough time of ≥480 minutes.

Contaminated gloves should be disposed of properly. Glove selection depends not only on the material but also on other quality factors, which may vary by manufacturer. Since this product is a mixture, glove resistance should be verified before use. The recommended glove penetration time is ≥480 minutes, but in practice, gloves should be worn for a maximum of 50% of that time.

Eye/Face Protection:

Wear safety glasses with side shields (e.g., EN 166).

Body Protection:

Wear chemically resistant protective clothing (EN 14605) and protective boots.
